### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance claim 1 is that the prior art of record does not teach the resilient structure extending through the core between the first and second opposing walls of the housing, the resilient structure including a body, a first end coupled to the first wall and a second end coupled to the second wall. The body of the resilient structure radially engages the inner surface of the core to store torsional energy by twisting elastically as the core is rotated.

The primary reason for allowance claim 23 is that the prior art of record does not teach the resilient component that "is configured to store a torsional energy by twisting elastically when the ribbon is rotated such that when the ribbon is withdrawn the torsional energy serves to retract slack when the ribbon is backfed" as argued by applicant (the Remarks, page 5, first paragraph).

The primary reason for allowance claim 49 is that the prior art of record does not teach the resilient member extending through the hollow core, the resilient member having at least one spring section and a clutch section which radially engages the hollow core such that a rotation of the clutch section creates an elastic twist in the spring section biased to the rotation that serves to retract slack in the donor ribbon when the donor ribbon is backfed.

The limitations in the claims are not rendered obvious by any proper combination of the prior art known to the Examiner.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Nguyen whose telephone number is (571) 272-2169. The examiner can normally be reached daily from 9 AM to 5PM.
